

Ammonia EVACUATOR By **itc**

Here Comes the Ammonia Eradicator

ITC designs this fan "Ammonia Evacuator" to eradicate the leaking ammonia gas by blowing ammonia out and dissolving it in the atmosphere. This is emergency equipment which plays an essential role in providing safety in work field areas.

The fan can rotate at 1,370 rpm which creates a huge airflow of 8,000 m³/hr. Furthermore, the fan's blades are made from high quality aluminum. Also, its guard and housing are steel coated with powder paint which appears a genuinely stylish evacuator.

Therefore, ITC designs this equipment to be premium quality, reliability and durability. Among other evacuators in the market, this is the most competency machine that you have ever known.

Ammonia EVACUATOR By

Ammonia Evacuator

Based on the designed technical data, it features the following:

FAN		Material	
Fan Type	Propeller	Fan Blade	Aluminum
Diameter	500 mm	Hub	Aluminum
Air flow	8,000 m ³ /hr	Fan Guard	Steel with powder paint
Motor install	0.97 kW	Housing	Steel with powder paint
Speed	1,370 rpm	Hand rail	Stainless steel
Electrical supply	380 V-3 Φ -50 Hz	Electrical cord	10 m
